**Subject:** I talked to Juneau County this morning

The counties are working with UW Stevens Point to prioritize the sampling (certain areas first, other areas later). The County is concerned about the cost of sampling. UW is NOT going to do the sampling itself- UW is only trying to help the Counties prioritize where the Counties might eventually sample.

The County has its sampling analysis equipment authorized, but not yet purchased. It could take up to a year to get a sampling program up and running.

The County is looking at the issue of drilling deeper wells below the nitrate saturated zone. Potential cost \$7k-\$8k. Data shows nitrate concentrations drop below 60 feet. It's a longer term issue that requires some sampling.
